

At Assystem Care, we embrace your most complex challenges and anticipate new regulatory and technology paradigms in the life science industry. Our unique advisory offer integrates end-to-end engineering, quality and performance management throughout your whole industrial life cycle, with a transverse vision of systems engineering: from conception & engineering to batch release and operations optimization. Starting from your challenges, our team of experts develops the customized solutions you need based on our methodologies and our own first-of-a-kind smart tools.

Our team of 450 specialists located in Belgium, France and Switzerland offers support to both pharmaceutical and biotechnological enterprises throughout their project's lifecycle.

The Belgian team is currently looking for a Qualification and Validation Engineer.

Qualification and Validation Engineer

Your Role:

As a Qualification and Validation Engineer you are responsible for the successful execution of the assignments that you are responsible for:

- Coordinating and performing FAT/SAT as well as equipment commissioning
- Executing tests (IQ/OQ/PQ/DQ)
- Writing qualification and validation protocols
- Coordinating and reviewing the related GMP documentation needed for change control management
- Defining the validation strategy based upon the clients' guidance and benchmarks
- Ensuring the planning of validation and qualification strategies in accordance with all the concerned parties (production/QA/maintenance/C&M)
- Ensuring the operational management of the technicians dedicated to the validations

Your Profile:

- You hold at least a Master's degree in engineering, bioengineering, biology, pharmacy or related fields
- You hold at least one year of experience in qualification and validation in GMP environments
- You are familiar with the processes and legal requirements for pharmaceutical industry
- You are fluent in French and/or Dutch and a good level of English.
- You are proactive, have good communication skills, and are capable of working in a multidisciplinary team towards a common goal.

Our Offer:

- A salary in line with your experience
- A competitive package of extra-legal benefits (car, fuel card, insurance, meal vouchers, entertainment expenses, ...)
- Career opportunities both in Belgium and abroad
- Clear objectives and challenges!
- A people focused and motivating work environment
