

Looking for a thrilling challenge? Want to have a real impact on tomorrow's technologies? Boost your career and join an international environment !

We are part of ALTEN Group, European leader in Technology Consulting and Engineering. Our 24 000 top engineers are working on various activities linked with industry, life sciences and information technologies across 20 countries around the world.

Working closely with the best companies in Belgium, we keep growing and aim to reach a 1000 consultants community in 2019.

If you are up to the challenge, then keep on reading, and discover the amazing opportunity below...

Quality Engineer (M/W)

Responsibilities

As a Quality Engineer at ALTEN Belgium, you will join a team on client's site to work on the improvement of all the quality issues related to the products (electronics, mechanics), coming from the production team or the suppliers, in order to avoid them in the future.

We rely on you to optimize the quality of the production and to assure complete customer satisfaction. To succeed, you will be in charge of :

Implementing methods and quality tools

Insuring the required quality by identifying risks and defining corrective actions

Being the main contact with the production stakeholders and suppliers

Working closely with the maintenance team and the methods & process experts

Skills

You have an engineering diploma or a master degree in electronics, mechanics, mechatronics or manufacturing, with an interest for quality in the transport industry.

Tools and techniques you have or you want to work with:

FMEA, 8D, 5Why, SPC... / VDA, ISO, IPC, JDEC/ APQP, PPAP, ISO-TS...

In addition to your technical skills:

Your organized mindset and your analytical skills bring a benefit to all stakeholders.

You are proficient in English; any other European language is a plus

You have a hands-on mindset is an asset.
